Beauregard Parish Unified Command Group **COVID-19 JOINT PRESS RELEASE**

March 21, 2020

Local officials have been notified by the state that there is a confirmed COVID-19 case in Beauregard Parish.

This is not the time for residents to panic. It is time to be vigilant about following the guidelines and recommendations from state and federal officials in order to help keep you and your family healthy. These are the measures you've been hearing everyone speak of: Stay home, social distance, wash your hands frequently and sanitize. Do these things and encourage your loved ones to do the same.

Officials are getting daily guidance and information from state and federal partners. We will continue passing that information along to you.

One of the most important things you can do is to get your information from verified, reliable sources. There is a lot of misinformation being spread via social media. Spread facts, not fear.

Beauregard Parish is a strong community with a history of working together in the hardest of times. We're good neighbors. Let's all work together now to keep our community healthy.
